Fast Healthcare Interoperability – What you need to know about how HL7 FHIR® is changing the game

Wednesday 28 September 2016, 1.00pm – 4.30pm
BCS, 1st Floor, 5 Southampton Street, London, WC2E 7HA Map

Synopsis

FHIR® is now well established as an implementation standard of choice for interoperability requirements in healthcare. Globally, FHIR-based solutions have been developed and piloted for public health, Precision Medicine and genomics, BioPharma and basic research, mobile health and healthcare payers. NHS Digital is working on several FHIR projects, including collaboration with the Professional Record Standards Body (PRSB) and the INTEROpen vendor group to provide clinical validation of FHIR profiles for use in the NHS and social care. Local digital roadmap communities are looking at the opportunities FHIR gives to support regional information sharing needs. Join us on 28 September for an informative and interactive update on FHIR in the UK.

Programme

Session chair:	
Dr Philip Scott, Chair, HL7 UK; Vice-chair, BCS Health & Care	
Rik Smithies Technical Committee chair, HL7 UK	**A brief introduction to FHIR**
